## GROUP DISCUSSION- AN IMPORTANCE

A Group Discussion is a group of individuals, typically who share a similar interest, who gather either formally or informally to discuss ideas, solve problems, or make comments. A group discussion is a discussion between groups of participants on a given subject. It typically forms a part of the selection process used by organisations and educational institutions. The candidates talk about the given topic to present facts, opinions and conclusions. Group discussion also tells about how candidates behave, participate and contribute in a group. Group discussion plays an important role in a student's life. Group discussions in the classroom are not only useful for a student's social skills but also improve their educational development.

### Benefits of GD in a student's life

- **Enhance Critical Thinking:** Group discussion is used in a classroom to improve learning, asking open-ended questions will encourage critical thinking and help students think for themselves.
- **Help with Understanding:** Group discussion use to help students to understand a topic or concept deeply which will stay for a long time in their minds.
- **Improve Communication Skills:** It is also used to improve communication skills as it can encourage students to become more confident in speaking up and asking questions. This will help them improve their communication in the long run because it should make them more confident to ask if they're stuck and need help.
- **Improve Interest in Lessons:** It improves learning, as group discussion invites the students to be the speakers. This helps students as it can maintain their focus and concentration to hear another voice instead of listening to the same teacher, which holds their attention.
- **Provide the Feedback:** When learners discuss and explain the concepts to each other aloud in a group, it helps the teacher to hear if they have learnt a concept or not. This is perfect feedback on teaching. It means that, if the teacher sees that they don't understand something clearly, they can help them by stepping in and adding some more.

## Objectives of Group Discussion

Group discussion generates a creative thinking in all participants, something beyond the understandable answers and explanation to a specific topic.

- It provides more ideas and a strategic presentation of a topic.
- Improves confidence in public speaking platform
- It is a good way to engage the participants in a fruitful discussion
- GDs Allows thoughtful and in-depth understanding of the subject.

## Student Feedback

- It can help to create a more inclusive and effective learning environment for the students  
- K. Rishitha
- It can benefit to learn something new from the discussion and it help the students to understand the topic in better way  
- B. Bala Krishana
